Deadline: **6th December 2020 till 11:59 AM**

Subject: **Web Lab 09**

You'll develop a basic Expense Tracker using React Class Components (compulsory). Check the link below for complete functionality (use desktop):

<https://ets-pwa.surge.sh>

I've hosted it for you review.

You can add expense (-ive value) or income (+ive value). An expense will have a red marker whereas income will have green marker (you can use anything as marker e.g. border-color, background color etc. like you can see on the link provided). You should also have a functionality to remove transaction (expense or income). Designing does not matter that much.

Expense Tracker

Balance : \$0

Income \$0	Expense \$0
---------------	----------------

Transaction History
